Let's take a look at what evolutionists want us to believe...

Does this guy on the left look like a monkey in a shirt & tie?

Evolutionists believe that in the course of a FEW million of years he evolved into a human.

ape

+ Millions of years =

evolved ape

Does this guy on the left look like an alligator wearing a hat and a collar?

Evolutionists believe that in the course of TENS of millions of years he evolved into a human.

amphibian

+ Tens of millions years =

evolved amphibian

Does this guy on the left look like a fish with a hat and eye glasses?

Evolutionists believe that in the course of HUNDREDS of millions of years he evolved into a human.

fish

+ Hundreds of millions of years =

evolved fish

Does this guy on the left look like an amoeba wearing a hat?

Evolutionists believe that in the course of a few BILLION years he evolved into a human.

amoeba

+ Billions of years =

evolved amoeba

Does this thing on the left look like a BIG explosion?

Evolutionists believe that in the course of a VERY VERY long time, an explosion they call "the big bang" created everything we see.

a BIG explosion

+ A VERY VERY long time =

evolved explosion

Please note that this last analogy is VERY significant, because it points out where evolution BEGINS as well as where it ENDS. People who argue about various so-called midpoints on the make-believe evolution timeline should instead concentrate on the TWO ENDPOINTS of evolution and see who is willing to BELIEVE THAT STORY WITHOUT LAUGHING!

a BIG explosion

+

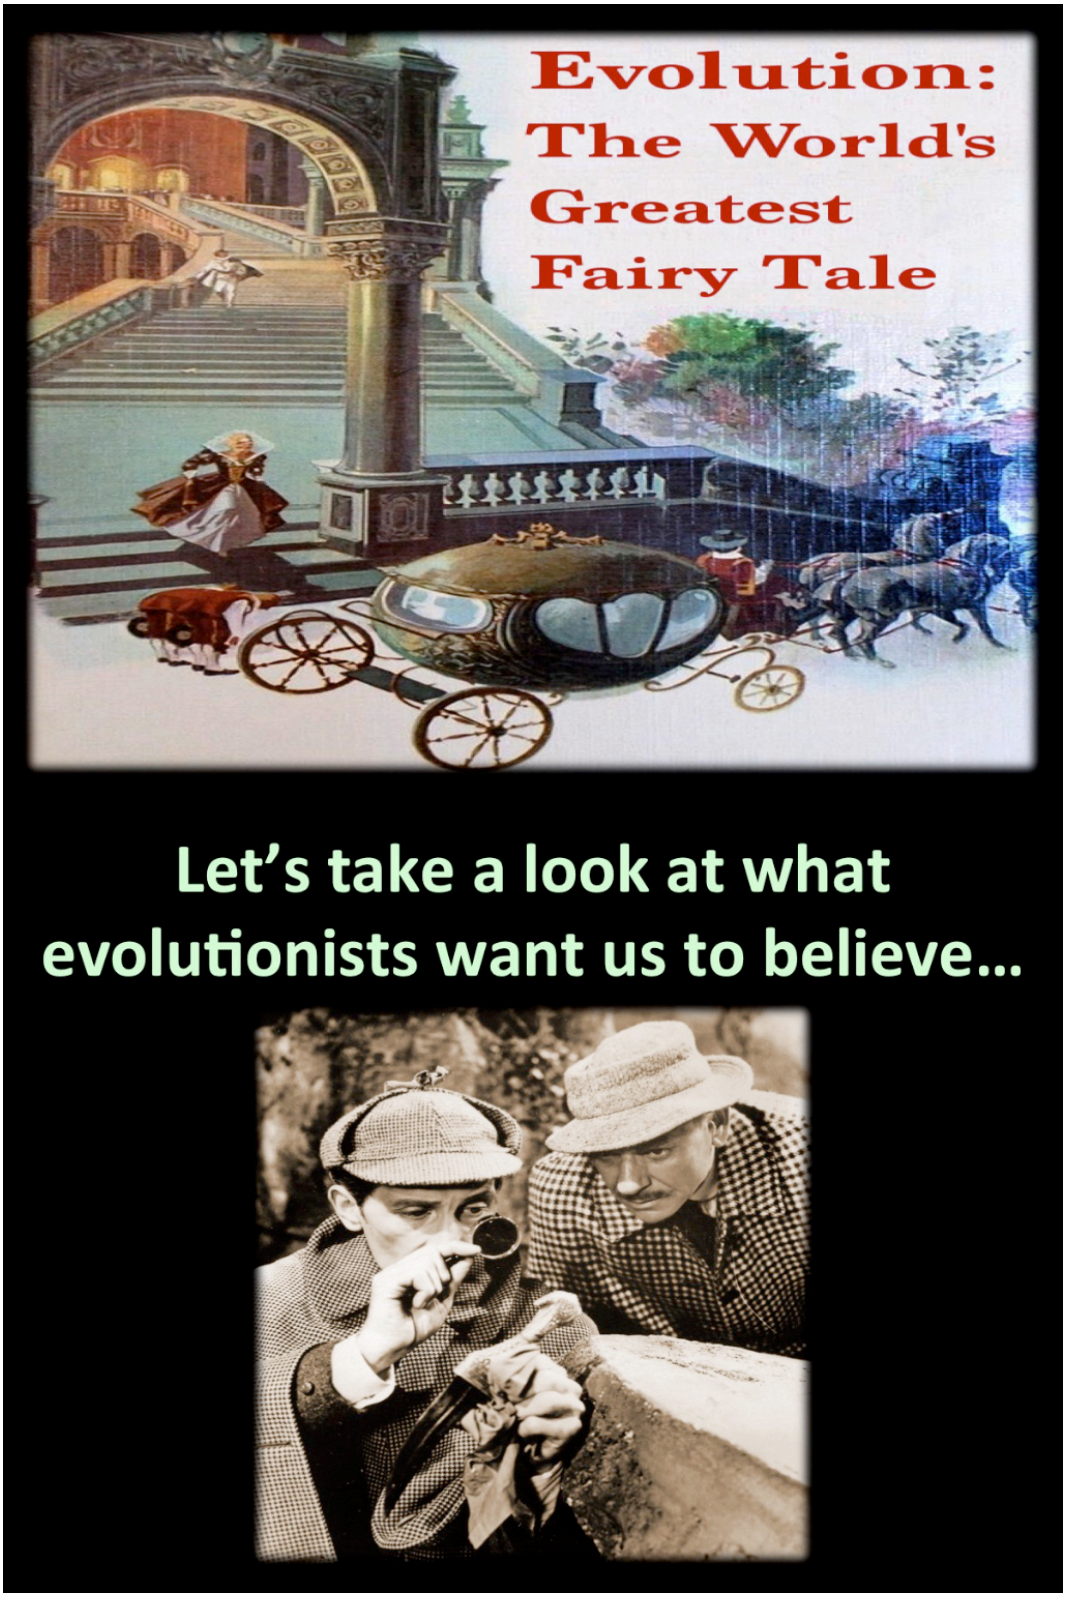
A VERY VERY long time

=

evolved explosion

What a ridiculous fairy tale evolution is!

The End



Evolution:
The World's
Greatest
Fairy Tale
Let's take a look at what
evolutionists want us to believe...

Does this guy on the left look like a monkey in a shirt & tie?

a BIG explosion

+ A VERY VERY long time =

evolved explosion

What a ridiculous fairy tale evolution is!

The End

There's got to be evidence for evolution somewhere!
